### **ENERGYUNITED RESPONDS TO WINTER WEATHER OUTAGES**

**STATESVILLE, N.C.** – EnergyUnited has crews working diligently to restore power to all its members who are without electricity as a result of the winter weather. Restoring power quickly and safely to our members is the cooperative’s highest priority, and crews will continue to work until power is restored to every EnergyUnited member.

In most cases today, outages were a result of heavy snow on tree branches which resulted in service interruptions. All of our EnergyUnited line crews, right-of-way, other cooperative and contract crews have made much progress since this morning and will continue to work throughout the evening hours to restore power in our more significant outage areas in the Yadkin River and Triad regions. As of late afternoon, more than 80% of all EnergyUnited outages have been restored, with about 1,000 members still without power.

Members may obtain up-to-the-minute outage information at the storm center on EnergyUnited’s website ([https://www.energyunited.com/storm\\_center\\_outages.asp](https://www.energyunited.com/storm_center_outages.asp).) Outage information will also be posted on EnergyUnited’s Facebook and Twitter pages found at <https://www.facebook.com/EnergyUnited> and <https://twitter.com/EnergyUnitedEMC>.

EnergyUnited reminds people to stay away from downed or sparking power lines and to report the location immediately to EnergyUnited by calling our customer care center at 1-800-522-3793.

#### **About EnergyUnited**

EnergyUnited is an innovative and dynamic energy services company, serves more than 120,000 electricity customers in 19 North Carolina counties, stretching from Virginia to northern Mecklenburg County and encompassing the fast-growing I-40, I-77, and I-85 corridors. Its service territory includes suburbs surrounding three of North Carolina’s largest cities – Charlotte, Winston-Salem and Greensboro. EnergyUnited makes customer satisfaction its highest priority, and its electric customers enjoy one of the highest reliability ratings in the industry.

EnergyUnited also provides propane to approximately 25,000 customers in 74 North and South Carolina counties and offers other specialized residential and commercial products and services. Visit EnergyUnited online at [www.energyunited.com](http://www.energyunited.com).
