ENERGYUNITED PREPARED TO RESPOND TO WINTRY WEATHER OUTAGES

STATESVILLE, N.C. – EnergyUnited continues to monitor closely a winter storm expected to impact our service territory this weekend. With a mix of snow and freezing rain anticipated to run through Sunday evening, EnergyUnited crews are ready to respond should outages occur.

- To report an outage **call 1-800-EUNITED (1-800-386-4833)**
- Real-time outage numbers can be found on our [Outage Map](#).
- Visit our [Storm Center Page](#) for important up-to-date information.

As always, safety is our number one priority. We expect travel to be treacherous due to icy road conditions. Please be cautious and avoid driving if possible. Also, be prepared for this wintry weather by making sure you have a way to stay warm if the power does go out. Dress in layers and make an emergency kit that includes the following items: extra blankets, flashlights, batteries, first aid kit, a battery-operated radio, canned food, manual can opener, and bottled water.

We also suggest keeping a list of contact numbers handy in case emergencies arise. Members who depend on electricity to operate medical equipment or have a special medical condition should have alternate arrangements in place in case power is out for an extended period of time. If you have an elderly neighbor or family member, we encourage you to check on them before, during and after a storm.

It is important to remember to stay away from downed or sparking power lines. If you see a line lying on the ground, assume it is energized and deadly. Call our customer care center at 1-800-522-3793 to report the situation. In the event of a major outage, rest assured that our crews will be working around the clock to restore power. As always, safety is our number one priority as we work to restore power.
