

**NET METERING RIDER – NON-RESIDENTIAL**  
**(RIDER NM-CI)**

**(PILOT)**

**Availability** – This Rider is available on or after July 1, 2018, in conjunction with one of the Cooperative’s Non-Residential Service schedules where customer-owned Renewable Generation is connected on the customer-side of the meter in parallel with the Cooperative’s electric system and is designed to offset a portion or all of the customer’s electrical requirements normally supplied by the Cooperative. The nameplate rating of the Renewable Generation shall not exceed the lesser of the customer’s estimated maximum annual kilowatt demand or 150 kW. The customer must own the property where the electrical service is received and delivered to the Cooperative. Renewable Generation connected in parallel with the Cooperative’s facilities must have safety, system protection, and power quality equipment installed and operated at the customer’s expense and in accordance with the rules of the Cooperative.

Service under this Rider shall be available in all territory served by the Cooperative and shall be subject to the Cooperative’s established Service Rules and Regulations as filed with the North Carolina Utilities Commission. The provisions of the Schedule with which this Rider is used are modified only as shown herein. The number of customers served under this Pilot shall not exceed ten (10), on a first-come, first-served basis.

**Type of Service** – Standard service under this schedule shall be as set forth in the applicable rate schedule under which the customer is currently receiving service.

**Rate - Monthly**

Basic Facilities Charge, Demand Charge and other Charges:

The Basic Facilities Charge and Demand Charge, and all other Charges except as expressly set forth below, shall be the applicable charge from the rate schedule under which the customer’s premises is currently receiving service.

**NET METERING RIDER – NON-RESIDENTIAL**  
**(RIDER NM-CI)**

**(PILOT)**

**Standby Charge:**

There is no monthly Standby Charge

**Energy Charge (or Energy Credits):**

For customers generating power from Renewable Generation, Energy Charges shall be based on the kilowatt hours purchased from the Cooperative for the month a bill is rendered times the Energy Charge specified in the rate schedule under which the customer is currently receiving service. Energy Credits shall be based on the kilowatt hours delivered to the Cooperative for the month a bill is rendered times the applicable Avoided Cost rate specified in the Cooperative's Rate Schedule AC. In any billing month for which there is Net Excess Energy such that the Energy Credits exceed the Energy Charges, the customer shall receive a net Energy Credit. If such net Energy Credit in a billing month exceeds the sum of the Basic Facilities Charge and all other applicable charges, then the net Energy Credit, net of such charges, shall carry forward onto the following month's bill.
