Data Centers

Thomas Golden
Chief Executive Officer

What are Data Centers and Why Do They Matter?

- Data Centers are facilities that store, manage and process digital information.
- They are growing fast!
 - CoBank says data centers could add \$13 trillion to the U.S. economy.
 - The U.S. government treats them like critical infrastructure.
 - Many are being built in rural areas.
- Two types of data centers:
 - Computation
 - Application

EnergyUnited's Position & Strategy

NOT BUILDING
DATA CENTERS,
BUT PLANNING
FOR GROWTH

POWER SECURED

DATA CENTERS

Local Examples & Looking Ahead

- **Stamey Farm Rd**
 - Supporting short-term power needs
 - Long-term load to be served by Duke Energy
- **Crawford Rd**
 - 80MW feasibility study with NorthPoint Development
 - Exploring data center or manufacturing use
- **Mooresville**
 - Project paused due to long-term partner uncertainty
- **Our Approach**
 - Proactive, not reactive
 - Focused on reliability, community impact & member protection

Costs & Energy Tips

Brett Alkins

Chief Operating Officer

Costs & Energy Tips

- As a not-for-profit electric cooperative, EnergyUnited is committed to delivering excellent service that exceeds member expectations.
- We offer great resources to help our members save energy and money.
