## Your Energy Experts

Dear Friends,

Springtime is the perfect opportunity to tackle some of those home improvement projects you've been putting off.

At EnergyUnited, we know that when you invest in changes around your home, you want them to look great and be functional. That's why we've launched the online EnergyUnited Energy Efficiency Store at [EnergyUnited.com/energyefficiencystore](http://EnergyUnited.com/energyefficiencystore) – to provide you with a convenient way to purchase home improvement products that can help you save money on your energy bills.

Our new online Energy Efficiency Store contains a variety of products to help you manage and save energy, all with free shipping. From smart thermostats to energy efficient showerheads and faucets, there are products available for any need. Our online store even gives you the opportunity to compare models of similar products so that you can purchase the item that best fits your home.

Many customers may also be considering updates to outdoor spaces or replacing major appliances. Our experienced energy experts can provide you with the information and advice you need to make the best possible

decisions for any project you choose to undertake. Whether you want to add a propane-fueled outdoor kitchen to your backyard, or replace that aging water heater by upgrading to a tankless water heater, EnergyUnited is here to guide you through the process as your trusted energy advisor.

Thank you for being a loyal customer of EnergyUnited. I'm glad that you continue to see value in the products and services we offer in your area. We are always working on new and improved ways to make your energy consumption easier and more affordable. We look forward to speaking with you about any questions or concerns regarding your energy use.

Warmly,

Jeff Ruffner  
General Manager

# Get **OUTSIDE** with **OUTDOOR PROPANE EQUIPMENT**

*Make the most of the beautiful spring weather with propane products from EnergyUnited!*

## **OUTDOOR KITCHENS**

EnergyUnited's line of propane gas-fired grills gives you the ease and control you need to serve up high-quality meals with family and friends. As easy to light as a kitchen range, these powerful grills offer constant heat and full control of your temperatures. EnergyUnited offers a wide variety of grills, from basic models to deluxe grills with smokers, griddle attachments and more!

## **EMBRACE THE EVENING**

Enjoy cool evenings spent outdoors with patio heaters and outdoor fireplaces that can raise outdoor temperatures by almost 30 degrees to ensure everyone is comfortable.

Also, consider adding propane-fueled lighting to your outdoor areas to create well-lit entertaining spaces with all the ambiance of natural flame. It's the perfect combination of function and character.

## **NEVER RUN OUT OF GAS**

The safest and most convenient way to manage propane gas for your grill is a direct-line hookup to your household propane tank. With a direct-line hookup you:

**Save Money** – the price you pay for propane in your home is less expensive than the what you'll pay for a propane cylinder.

**Stay Filled** – Never again will you crank up your grill just to realize you've run out of propane. Your grill will be fueled by your home's propane tank which EnergyUnited will keep filled and ready for use.

**Stay Safe** – direct-line hookups remove the dangers of transporting, storing and changing propane cylinders. Simply attach your grill to the line and you're ready to go!

## **GRILLING TIP**

*Go Unconventional!*

*Looking to impress your next backyard gathering? Grill unconventional foods like grapes! The sweetness of the grapes pairs with the char of the grill to create interesting flavors that are easy to prepare.*

### **Ingredients**

Bushel of grapes, still on the vines  
Olive oil  
Balsamic vinegar  
Crackers  
Any soft cheese

### **Directions**

Simply toss the grape vines in a mixture of olive oil and balsamic vinegar and throw them on the grill over medium heat until they darken and begin to pop, turning occasionally. Remove from the heat and serve with crackers and cheese.

**Save up to 50% on outdoor propane equipment at our showroom.**

## Stay Safe with EnergyUnited Propane

EnergyUnited is committed to providing safe and reliable energy to all of our propane customers. Each of our employees is trained extensively to safely deliver propane and install propane fueled devices. While we take extensive precautions to protect our customers, it is important that you are also well informed about how to stay safe when using propane products.

**Never use propane gas BBQ grills inside or under low awnings** – flames that flare during cooking may ignite furniture, walls and other flammable materials inside your home.

**Never use a propane cooking appliance as a heater** – EnergyUnited sells a wide variety of products specifically designed to provide propane heat. Using a grill or other appliance not meant for heating as a heat source could lead to dangerous situations.

**Keep portable electric generators outdoors** – running a generator inside increases the risk of carbon monoxide poisoning, among other hazards.

**Never leave a portable propane tank in a car or closed vehicle** – high temperatures inside a closed car can cause damage to the propane tank or lead to fire.

### IF YOU SMELL GAS

Immediately extinguish all open flames.

Turn off the gas supply of your propane tank, if it is safe to do so.

Call EnergyUnited at: 855-266-5404 for emergency assistance.

*Tankless water heaters are available for purchase at our showroom.*

## Save with EnergyUnited Propane Rebates

Did you know that EnergyUnited offers a number of rebates homeowners can use to offset the price of installing new propane-fueled appliances? These rebates are part of the Safe Appliance Installation Rebate Program to support the proper installation of new, energy efficient appliances.

*EnergyUnited customers are eligible for the following rebates*

**\$250 off** propane furnace or gas pack installation

**\$150 off** tankless water heaters

**\$50 off** propane-fueled cooktop or range

**\$50 off** propane fueled clothes dryer

Products like tankless water heaters are not only eligible for rebates, they can help your family save money on energy costs as well! A tankless system uses 30-50 percent less energy than other units by offering “on demand” heating only when you turn on the faucet. Plus, by providing a continuous supply of hot water, you won’t run out of hot water during times of extended use.

**See the full list of EnergyUnited appliance rebates at [EnergyUnited.com/propane](http://EnergyUnited.com/propane)**

## Take control with our convenient payment programs.

*To keep your bills low throughout the year.*

### It's time again to sign up for EnergyUnited's propane Smart Buy program, the best way to keep your monthly energy bills low.

Rather than receiving unexpected high bills when the weather turns cold, our Smart Buy plan allows you to pay one flat fee for 12 months – no matter how many deliveries you need. With no cost to enroll, this program is an easy way to ensure your heating costs don't break your budget.

Our customers can also use the Pre-Buy program, which allows you to purchase propane gas in

advance at a set price per gallon, to further control your propane bills.

Customers who are concerned with the rate spikes we often see in winter months can take advantage of our Lock-In program. This program allows you to lock in a fixed rate, protecting you and your family from any unexpected rise in fuel costs.

Enroll today by calling 1-888-895-4114, visiting [EnergyUnited.com/propane](http://EnergyUnited.com/propane) or emailing [propaneinquiries@energyunited.com](mailto:propaneinquiries@energyunited.com).

**WIN  
\$1,500  
off a new  
generator**

*By shopping online at our Energy Efficiency Store*

**EnergyUnited is proud to announce the launch of the EnergyUnited Energy Efficiency Store.** This new online marketplace offers customers the opportunity to purchase a variety of energy efficient products, from LED light bulbs to energy-saving smart thermostats and everything in between!

As an added incentive for shopping, the first 20 propane customers to shop in the store will be entered in a drawing to win \$1,500 toward the purchase of a home generator.

*Find out more about the store and start shopping at [EnergyUnited.com/energyefficiencystore](http://EnergyUnited.com/energyefficiencystore).*
