EnergyUnited invites applications for the position of Vice President Engineering and Operations, reporting directly to the CEO.

The VP is a member of the Executive Leadership and will be responsible for planning, organizing, developing and implementing programs in the areas of engineering and system electrical capabilities, reliability and operations and maintenance. Ten (10) years’ experience in the field of engineering and electric plant construction/operation area is required. Five (5) years or more of progressive management in the electric utility or a related industry. A demonstrated commitment to positive leadership and teamwork is paramount, along with the ability to communicate effectively, both written and oral. Organizational and administration management in an electric utility is highly desirable. Negotiating and interacting with public officials and business leaders is necessary. Experience in a team based environment is highly desirable. Must be innovative and focused on quality and safety while being a self-starter. Bachelor's degree in Electrical Engineering or other related field required. Professional Engineer certification required. MBA is preferred.

Other areas include:

- Responsible for smart grid technology as it relates to the design and operations of the electric system.
- Strong knowledge of the National Electric Safety Code, RUS construction specifications and knowledge of emphasis toward safety practices within the electric utility industry.
- Know and support the policies and procedures of EnergyUnited EMC, and then inform team members as well as the community. Have the flexibility to sponsor change as procedures and practices change.
- The ability to communicate effectively to motivate and educate others.
- Community involvement as a representative of the cooperative.
- Safety and human performance leadership.
- Expertise in planning and controlling capital construction and operating expense budgets.

Normal working hours of 8:00 a.m. until 5:00 p.m. Some irregular working hours may be required. Must be available for work during adverse weather conditions. The responsibilities of the position will require travel in all areas of the system. The VP of Engineering and Operations must make their domicile within one of the nineteen (19) counties served by the Cooperative. If not within the 19 counties served by the cooperative, must be willing to relocate.

EnergyUnited EMC, a member owned electric and propane cooperative, is the third largest provider of residential electricity in North Carolina and among the 15 largest electric coops in the United States. With offices in seven cities, EnergyUnited’s service area stretches from the Virginia border to Mecklenburg County. The headquarters office is located in Statesville, North Carolina, a beautiful rural area convenient to urban amenities in Charlotte and Winston-Salem. Affordable housing, excellent schools, abundant cultural and recreational activities make this a great place to live.

The company offers an excellent benefits package, including a competitive salary commensurate with qualifications and the prevailing market. Please send an electronic resume, cover letter and salary requirements to:
